Claim Rejections - 35 USC § 102 and 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 14-18, 24-28 are rejected under 35 U.S.C. 102(a or e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Oda et al (5,804,523), Tajima et al (5,885,916) and Hintermayer et al (5,998,319), each taken alone, for reasons of record.

Applicants' argument that the prior art references fail to teach a molar ratio of SiO₂ to (SiO₂ + sintering aid) of .65 to .74 is not persuasive. It should be noted that when the ratio of the instant claims is converted to SiO₂ to (sintering aids other than SiO₂) the ratio is then 1.8 to 2.85. For example if the molar ratio of SiO₂ to (SiO₂ + sintering aid) is .65 then the molar ratio of SiO₂ to (sintering aid) is .65:.35 which is 1.8. Clearly the molar ratios taught by the prior art references fall within the ranges. Furthermore in view of the "comprising" (line 1) terminology the claim is considered to be open to more than one sintering aid. Note claims 16-18 refer to "sintering aids". As to the silicon oxynitride phase, the prior art references do not suggest the presence of this phase, therefor absent tangible evidence to the contrary, by way of a declaration the phase would not be expected to be present. Also applicants have not shown by way of tangible evidence that the prior art bodies do not possess the claimed properties.

It is well settled that when a claimed composition appears to be substantially the same as a composition disclosed in the prior art, the burden is properly upon the applicant to prove by way of tangible evidence that the prior art composition does not necessarily possess characteristics attributed to the CLAIMED composition. In re Spada, 911 F.2d 705, 15 USPQ2d 1655 (Fed. Circ. 1990); In re Fitzgerald, 619 F.2d 67, 205 USPQ 594 (CCPA 1980); In re Swinehart, 439 F.2d 2109, 169 USPQ 226 (CCPA

Art Unit: 1755

1971). The examples of the instant specification do not have examples that are representative of the applied prior art.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
